### PROFILE

I am a graduate researcher currently working at Hong Kong University of Science and Technology. my current field is the application of deep learning in time series forecasting. I am good at collecting information and making advances on the base of others' work. I am self-motivated to conduct the research. I am eager to gain a deep understanding of the essence of deep learning.

---

### SKILLS

Git

Python

Data analysis

Matlab

---

### WORK EXPERIENCE

#### Research assistant

##### Hong Kong University of Science and Technology

2023-2024

- Our work is focusing applying deep learning tools to the time series task, especially time series forecasting. I have applied my knowledge and combined some state-of-art research to improve the accuracy of forecasting electricity demand and will explore some improvements in long-term time series forecasting in various tasks.

### EDUCATION

#### bachelor

##### University of liverpool and Xian Jiaotong liverpool university

2017-2021

- I studied first two years in Xian Jiaotong university and next two years in University of liverpool, i obtained first degree in computer science and engineering with GPA of 3.94 and averge score of 80

#### Master

##### University College London

2021-2022

- I obtained the merit class in Scientific and Data-intensive computing with a GPA of 3.6.
-
